

EXOSOME TECHNOLOGY, CUSTOM CALIBRATED

PIONEERING EXOSOME TREATMENTS

Designed to restore, repair, and regenerate aging skin, these exosomes provide a customized, non-invasive, rejuvenating experience for optimal benefits. Master next generation cell signaling with one topical application for microneedling, RF, PRP, laser, and various skin and hair treatments.

HAIR EXOSOMES

Debuting as the only targeted exosome treatment solution for hair health, AnteAGE MDX® Hair Exosomes beautifully enhance hair microneedling treatments or PRP results.

Our hair exosomes are cultured specifically to outperform in WNT signaling. We then fortify this elixir with caffeine and azelaic acid to stimulate follicles and counteract effects of DHT, nominating this concoction as an excellent solution for ranges of hair loss.

BRIGHTENING EXOSOMES

Amplify your brightening results by pairing AnteAGE MDX® Exosomes with our customized Brightening Diluent.

This targeted diluent is fortified with tranexamic acid and proven peptides to provide results that are safe for all Fitzpatrick levels, melasma and post-hydroquinone patients.

AnteAGE MDX®
Growth Factors & Exosomes

THE FUTURE OF REGENERATIVE THERAPIES

FROM THE POWER OF STEM CELL TECHNOLOGY

Mesenchymal stem cells (MSCs) derived from bone marrow represent the pinnacle of cellular versatility and power in the human body. These remarkable cells have the unique ability to differentiate into various cell types, playing a crucial role in combating injury and inflammation.

BMSCs naturally produce an array of growth factors. Extensive peer-reviewed research has shown that these growth factors possess potent anti-inflammatory and anti-aging properties. These findings are the cornerstone of AnteAGE products.

As aesthetic research evolves, so do our applications of cellular technologies. AnteAGE has integrated umbilical stem cells from Wharton's jelly into our product line, enhancing our range of Growth Factor and Exosome products. These innovative formulas are designed to seamlessly integrate with any aesthetic treatment, promoting rapid skin healing and cellular repair.

At AnteAGE, we are dedicated to shaping a future where beauty and science converge effortlessly. By incorporating our advanced stem cell technology into your practice, you can offer your patients regenerative therapies that deliver unparalleled results.

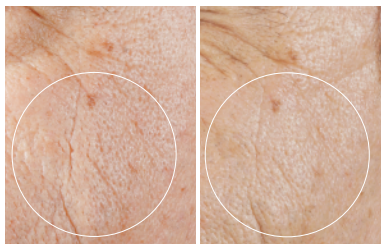

SKIN REGENERATION NEEDLING AND ENERGY BASED TREATMENT + EXOSOMES

Incorporate AnteAGE MDX® Exosomes or AnteAGE MD® Growth Factors into your treatments for accelerated healing and optimal patient outcomes.

WE HAVE SOLUTIONS FOR
Hyperpigmentation • Brightening • Fine Lines and Wrinkles
Aging • Stretch Marks • Acne Scars • Minimal Downtime

Days 1-4 with AnteAGE MDX® Solution
Post-procedure nano fractional, laser peel
and deep CO2 around eyes

30 Days After One AnteAGE MDX®
Microneedling Treatment

30 Days After One AnteAGE MD® Brightening Solution
Microneedling Treatment

2 Weeks After One AnteAGE MDX®
Microneedling Treatment

HAIR GROWTH ENHANCED WITH EXOSOMES

Kick start the growing phase with our targeted products and technology.

AnteAGE MDX® Hair Exosomes are specifically targeted to upregulate WNT signaling while other active ingredients counteract the effects of DHT. Hair follicle genesis, function and phase transitioning is impossible without WNT signaling.
