

Biosome™ Solution

IDEAL FOR TREATMENTS ADDRESSING :

- Fine lines and wrinkles
- General anti-aging
- Pigment
- Textural irregularities like acne scars and stretch marks
- Visible pores
- Dull/lackluster skin

PREP

2 weeks before a Biosome Treatment prep the skin by applying 1-2 pumps of Serum & Accelerator twice daily.

DURING TREATMENT

With a gloved hand, cleanse and disinfect area.

Apply topical analgesic per protocol.

Remove thoroughly with an alcohol solution.

Divide treatment area into sections.

Reconstitute **AnteAGE MDX® Biosome Solution** with included **Diluent**, **AnteAGE Brightening** or **Hair Solution**, or other dilutant of your choice. Gently shake for 10 seconds to mix thoroughly.

If Microneedling, apply **AnteAGE MDX® Biosome Solution** to the skin in sections to use as a glide for the treatment.

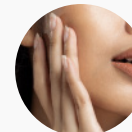

For all treatments, finish by applying **AnteAGE MDX® Biosome Solution** topically to entire treatment area.

IMMEDIATELY AFTER

Give the patient **AnteAGE® Hyaluronic Acid** following Microneedling or **Biogel** following any other treatment to apply for the remainder of the day as needed.

Do not apply anything else to the skin, including SPF for 24 hours.

POST CARE

- 24 hours post Microneedling, the client can begin using 1-2 pumps of **AnteAGE MD® Serum & Accelerator** twice daily followed by SPF.
- 5 days post Ablative treatments, the client can begin using 1-2 pumps of **AnteAGE MD® Serum & Accelerator** twice daily followed by an SPF.

OTHER TREATMENTS

LED may be combined with treatment.

Can be used with PRP treatments.

POST CARE

Send patient home with the **AnteAGE MD® Stem Cell Aftercare Kit**. This will give them a 3-5 day sample of growth factor skincare to optimize their treatment outcome..
